CME E-mini S&P Asia 50 Futures

Global Leadership in the Financial Marketplace

CME is the largest and most diverse financial futures and options exchange in the world – handling nearly 800 million futures contracts worth more than \$460 trillion in a single year. Founded in 1898, we serve the risk-management needs of customers around the globe by offering the widest range of benchmark financial products available on any exchange, traded via our CME Globex electronic trading platform and on our trading floors. Our innovative products cover major market segments – including interest rates, equities, foreign exchange, commodities and alternative investment products – and improve the way these markets work for customers everywhere.

CME Equity Products

CME is the dominant marketplace for equity derivatives. More than 90 percent of all U.S. stock index futures and options trade at our exchange, presenting one of the world's most liquid trading environments for equity products. CME offers the widest array of equity futures and options on futures products, which include the S&P 500 and S&P MidCap 400 Indexes, the NASDAQ-100 Index, the Russell 1000 and Russell 2000 Indexes, and the Nikkei 225 Index.

About CME E-mini S&P Asia 50 Futures

CME, the world leader of stock-index futures trading, is at the forefront in providing innovative derivatives products. Now CME is the first exchange to offer futures on a Pan-Asian Index – **CME E-mini S&P Asia 50 futures**.

The contracts are based on Standard & Poor's Asia 50 Index, a broad-based index comprised of some of the largest, most liquid blue-chip issues in four major Asian markets: Korea, Hong Kong, Taiwan, and Singapore.

Markets such as these have demonstrated high gross domestic product (GDP) growth, savings rates exceeding 25%–30%, and tremendous infrastructure investment, attracting the attention and capital of equity investors from around the world.

While derivatives on specific indexes such as the Hang Seng, KOSPI, and Nikkei 225 have become popular with traders and institutional investors, until now there has not been a futures contract available that tracks the region as a whole. CME E-mini S&P Asia 50 futures give investors an ideal benchmark derivatives product for Asia.

The CME E-mini S&P Asia 50 futures contracts employ the time-tested, electronically traded CME E-mini design pioneered by the exchange and made popular with individual and institutional investors alike. Like all CME E-mini products, CME E-mini S&P Asia 50 futures are designed to trade exclusively on the CME Globex electronic trading platform, where investors will have virtually 24-hour access to the benefits offered by these products.
